

Objective

Train African youth in various tech skills.
Build a capable team to become solution-oriented global leaders.
Monitor and incubate start-ups and innovative ideas.
Create a product to address challenges in various African sectors.
Develop a GPRS-enabled event and job tracking app for enhanced service accessibility.

Tech Skills Training:

Train African youth in a comprehensive range of tech skills, including Software Development, data analysis, artificial intelligence, app development, product design (UI/UX) Digital MARKETING AND CONTENT DEV,
Implement hands-on, practical learning experiences to ensure real-world applicability.

Global Leadership Development:

Foster leadership qualities among trained youth, emphasizing problem-solving, critical thinking, and effective communication.
Facilitate mentorship programs with established global leaders to provide guidance and inspiration

Start-up Incubation and Idea Monitoring:

Establish a structured incubation process for start-ups and innovative ideas emerging from the training program.
Provide ongoing mentorship, access to resources, and networking opportunities to nurture entrepreneurial venture

Tech Solutions Product Development:

Conduct thorough research to identify challenges in key sectors (e.g., healthcare, agriculture, education) across Africa.
Form interdisciplinary teams to develop innovative technology products addressing identified challenges.

GPRS Event and Job Tracking App:

Develop a user-friendly app with real-time GPRS tracking for events and job opportunities. Ensure the app's accessibility across various devices, making it a reliable tool for both service providers and users.
